Comments received from participants who have rated your training:

- Very good games that I did not know before
- Great structure but felt a bit rushed at the end
- Really like the integration of all different concepts (lean startup, agile, lean PD...)
- (+) It was very interesting know about Goodyear's experience. The games were fun and with strong relation with the concepts seen. (-) I think we would have needed a little time to reflect and review the concepts seen. At the end of the training was somewhat rushed.
